**Election/Restrictions and Reasons for Allowance**

***Election/Restrictions***

Newly submitted claims 94-130 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Newly submitted claims 94-130 are distinct species and do not require the specifics of claims 1 and 6, in particular, the varying of the radius of curvature of a locally spherical portion of the optical measurement surface to contact a conical portion of the measurement surface, and detecting the interference pattern as a function of the radius of curvature.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 94-130 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

This application is in condition for allowance except for the presence of claims 94-130 to a species non-elected without traverse. Accordingly:

**Claims 94-130 are cancelled.**

*Allowable Subject Matter*

**Claims 1 and 6 are allowed.**

The following is an examiner's statement of reasons for allowance: In view of the filing of the terminal disclaimer, the prior art of record fails to show or to suggest an interferometric apparatus producing an interference pattern from a measurement wavefront and a reference wavefront having all the limitations as presently claimed having a means for varying of the radius of curvature of a locally spherical portion of the optical measurement surface to contact a conical portion of the measurement surface, and detecting the interference pattern as a function of the radius of curvature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Hwa S. Lee whose telephone number is 571-272-2419. The examiner can normally be reached on Tue-Fr.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley Jr. can be reached on 571-272-2800 ext 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
